

1.Can you list the selection criteria that will be used for the preselection and their respective weights in the evaluation grid?

The call for proposal (and attached documents) establishes: *"It is fundamental to clarify that the ideas presented on the call will be only used as inputs on the construction of the General Conditions documentation"*.

This is a dialogue, not a formal selection. The dialogue would allow us, beside others things: (i) to identify interested innovators; (ii) detect those emerging technical and scientific elements not included in the preliminar call; (iii) to analyse some project feasibility elements.

2. What is the final deadline for the submission of the offers?

The call establishes: *"The proposals must be sent to an institutional email during the first 2 months after the call is published"*.

June 12th is the deadline.

3. Before to submit our proposal, do we need to sign a Non-Disclosure Agreement that will protect any confidential information that we will be sharing with the Colombian authorities? And if yes, can we provide our template?

The call for proposal establishes:

"By the time proposals are presented, the INC, the Universidad Nacional de Colombia and Colombia Compra Eficiente will start a technical, individualized and confidential dialogue between the technical team of the INC and the technical team appointed by the innovators. Colombia Compra Eficiente will follow the process related with the public procurement of innovation, including the legal affairs".

If you wish, you could send the template in advance in order to check it by the legal office. We are going to send the comments before to start the dialogue.
